Sara Ahmed - Data Analyst

GitHub: github.com/sara-analytics

Summary
Data Analyst focused on shipping reliable, measurable results for clients.

Skills
SQL, dbt, Snowflake, BigQuery, Apache Airflow, Tableau, Power BI, pandas, Excel, A/B testing (and more)

Selected projects
- Checkout A/B test analysis for an manufacturing retailer (2026): a rigorous readout of a pricing-page experiment; identified a 76% conversion lift. Tools: A/B testing, Python, pandas. [github.com/sara-analytics/ab-test-review]
- CRM to warehouse ETL pipeline for a legal sales team (2026): hourly syncs from the CRM into BigQuery; 20000 records synced daily. Tools: ETL pipelines, Apache Airflow, Python. [portfolio/crm-pipeline-legal]
- Customer data cleanup and dedup for a SaaS company (2026): a reproducible cleaning notebook for 800 customer rows; duplicate rate cut to 5%. Tools: pandas, Python, Excel. [portfolio/data-cleanup-saas]
- Warehouse modelling with dbt for a real estate startup (2025): 150000 tested dbt models with documented lineage; data incidents down 24%. Tools: dbt, Snowflake, SQL. [github.com/sara-analytics/warehouse-models]
- CRM to warehouse ETL pipeline for a real estate sales team (2025): hourly syncs from the CRM into BigQuery; 1200 records synced daily. Tools: ETL pipelines, Apache Airflow, Python. [portfolio/crm-pipeline]
- Operations KPI dashboard for a manufacturing business (2025): a KPI dashboard with targets and alerts; 77% fewer missed SLAs. Tools: Power BI, SQL, Excel. [portfolio/ops-kpis]
- Customer data cleanup and dedup for a real estate company (2025): a reproducible cleaning notebook for 20000 customer rows; duplicate rate cut to 9%. Tools: pandas, Python, Excel. [portfolio/data-cleanup]
- Checkout A/B test analysis for an real estate retailer (2025): a rigorous readout of a pricing-page experiment; identified a 54% conversion lift. Tools: A/B testing, Python, pandas. [portfolio/ab-test-review-real-estate]
- Monthly finance reporting automation for a logistics firm (2025): automated board reports in Power BI; close process 8 days shorter. Tools: Excel, Power BI, SQL. [portfolio/finance-reporting-logistics]
- Executive sales dashboard for a media company (2024): a drill-down dashboard replacing 8 weekly spreadsheets; reporting time down 64%. Tools: Tableau, SQL, Snowflake. [github.com/sara-analytics/sales-dashboard]
- Executive sales dashboard for a media company (2024): a drill-down dashboard replacing 9 weekly spreadsheets; reporting time down 56%. Tools: Tableau, SQL, Snowflake. [github.com/sara-analytics/sales-dashboard-media]
- Warehouse modelling with dbt for a logistics startup (2024): 150000 tested dbt models with documented lineage; data incidents down 64%. Tools: dbt, Snowflake, SQL. [github.com/sara-analytics/warehouse-models-logistics]
- Monthly finance reporting automation for a fintech firm (2023): automated board reports in Power BI; close process 3 days shorter. Tools: Excel, Power BI, SQL. [github.com/sara-analytics/finance-reporting]

- Marketing funnel and attribution analysis (manufacturing) (2023): a funnel model from GA4 exports in BigQuery; reallocated 27% of ad spend. Tools: Google Analytics, BigQuery, SQL. [portfolio/marketing-attribution-manufacturing]
- Operations KPI dashboard for a fintech business (2023): a KPI dashboard with targets and alerts; 71% fewer missed SLAs. Tools: Power BI, SQL, Excel. [github.com/sara-analytics/ops-kpis-fintech]
- Marketing funnel and attribution analysis (e-commerce) (2022): a funnel model from GA4 exports in BigQuery; reallocated 25% of ad spend. Tools: Google Analytics, BigQuery, SQL. [github.com/sara-analytics/marketing-attribution]
